Individual reflection: Week 43

What do I want to learn or understand better?

At this point I enjoyed the journey of my progress. comparing the first week and now. I got used to scrum and the application of scrum. I've also understood how good it is to construct and arrange user stories in order to fulfill the conditions. What I want to understand better is to get more comfortable with the agile structure. And the only way to do that is to make projects with the agile method.

How can I help someone else, or the entire team, to learn something new?

Nothing has changed from previous weeks. But I'm always trying to look for more resources that could be beneficial when helping myself or other team members. Our team was very helpful and showed the ability to help other team members.

What is my contribution towards the team's use of Scrum?

Nothing has changed.

What is my contribution towards the team's deliveries?

I've always tried to deliver on time and ask my team for help when I got stuck. The stand up meetings opened the opportunity to discuss our problems and were advantageable.
